Titan JDE Report Design Specification Document

Name of Report (issued by requestor)
Report (Issues by Developer)

Date

Who is responsible for this report?

Approving Manager:
Report Tester:

Approvals

Date	Milestone	Resource	Approved By	Notes
	Approved for Development			
	Technical design complete			
	Development complete			
	Unit testing complete			
	Integrated testing complete			
	Promote to production			
	Working properly in production			
	Documentation complete			
	Training complete			

Security

What users or group users will need security access to this report?

What Area/Module does this report pertain to?

    Is the report for parts, service, units, etc

Who is the report developer?

How many versions are needed, what title to be on menu, where on the menu should it be placed?

    Give any version requirements, such as how many versions and who each version is for, if to be on the menu where and title

Functional Requirements

Is this a new requirement or change to existing object?

If change, what is the object name (e.g. R550001) and description (e.g. Daily Sales Report):

Business purpose for this development requirement:

Use this space to give a narrative description of what the report is for, what it does, tables and field alias' involved with any calculations or special uses such as alias DOCO must equal ????

Describe any special nuances or other particular details that will help the developer to understand what is required:

- **Narrative list of things like alias and tables to be used. If a outside data source will be used to identify which records are affected or changed. Any conditions there maybe for selecting a record to print or change, etc**

Required Elements

Fields:

Field Name	Notes	Screen or application (if known)	Alias (if known)	Table (if known)

Format:

Attach an example of how you want the report to look. Provide as much detail as you can.

Technical Requirements (completed by developer)

Object Type: UBE
Object Name: Rnnxxxxxx
System Code: nn
Enhancement Type: New
Description:

Describe high level design plan:
Date, and add separate paragraphs for changes to original plan.

Sections in this Batch Application:

No.	Name	Description	Type	Business View
1	Page Header	Page Header	Group	NA
2	Detail	Detail	Columnar	
3	On	Level Break Footer	Level Break	NA

Related Tables by Section:

Section Name	Table Name	Business View	Description	Key Fields Joined	Notes
Detail	Fnnxxxxxx	Vnnxxxxxx			

Output Format for Detail Section:

Alias	Description	Headings	Source of Data	Notes

Processing Options:

No.	Tab	Description/Edits	Data Item	Default Value
1				
2				

Interconnect Data Structure – Rnnxxxxxx

Alias	Description	Attributes	Source of Data	Notes

Development Notes:

In the charts below list all reports, applications, tables, forms, etc. to be used or affected.

Object definitions:

Object Name	Description	Type	New/ Changed/ Existing
Pnnxxxxxx		Application	New
Nnnxxxxxx		BSFN	New
Bnnxxxxxx		BSFN	New
Rnnxxxxxx		UBE	New
Pnnxxxxxx		Application	New

Data Structure definitions:

Data Structure ID	Description	Related Object Name	New/ Changed/ Existing
Tnnxxxxxx			New
Tnnxxxxxx			New
Dnnxxxxxx			New
Gnnxxxxxx			New

Table/Business View definitions:

Table/ Business View	Description	Type	New/ Changed/ Existing
F55xxxxx		TBLE	New
F55xxxx		Index	New
V55xxxx		BSVW	New
V55xxxx		BSVW	New
F55xxxx		TBLE	New

User Defined Codes Information

System Code	Code Type	Description	Size	New Y/N	Hard Coded Y/N	Values	Definition

Next Number Information

System Code	Index Position	Use	Next Number	Check Digit Used (Y/N)

Business Function Specs
(Specification details for new business functions or changes to existing business functions.)
New Business Views

Business View: Vnnxxxxxx		
New Business View Name:		
Required Fields:		
Alias	**Data Item Name**	**Table**

Join Details:
Fnnxxxxxx.*alias* = Fnnxxxxxx.*alias*

New Tables

Table: Table Name: Fields:	Fnnxxxxxx			
Alias	**Data Item Name**	**Data Type**	**Size**	**Index Y/N**
